

Rebirth Globe

The Future of Longevity & Advanced Wellness

A premium introduction to the vision, innovation, and experience shaping the next era of regenerative wellbeing.

Rebirth Globe unites advanced regenerative technologies, science-led longevity protocols, and a refined client experience to help people live longer, healthier, and more vibrant lives.

Regenerative Science

Harnessing the latest advances in cellular and biological renewal

Advanced Technology

State-of-the-art devices and therapeutic systems

Premium Experience

A personalized wellness journey crafted for every client

Our Vision for Advanced Wellness

Rebirth Globe is dedicated to advancing the future of longevity and human performance. We curate state-of-the-art technologies and science-backed protocols to support individuals in achieving optimal health, resilience, and extended vitality. Our integrated approach promotes comprehensive well-being, from cellular rejuvenation to lifestyle optimization. Explore our ecosystem and mission at www.rebirthglobe.com.

Global Reach

Delivering advanced longevity solutions to a global audience and building a community committed to better health.

Integrated Systems

Aligning diverse technologies and wellness practices to create a powerful, unified impact on health.

Personalized Journeys

Tailoring experiences and protocols to individual needs, informed by cutting-edge diagnostics.

Future Growth

Our unwavering commitment to extended vitality fuels an ambitious roadmap for global impact and continuous innovation.

Rebirth Globe is building toward becoming the world's leading longevity brand by scaling a global distribution model engineered for rapid, high-quality expansion, forging strategic partnerships that extend our reach and deepen our expertise, and continuously advancing our technology stack to stay ahead of the wellness industry. This forward-looking strategy combines premium experience design, scientific rigor, and operational scalability to create a category-defining platform for the future of health.

Global Footprint

Expanding Rebirth Longevity Rooms into new markets to make advanced wellness accessible worldwide.

Pioneering Research

Investing in cutting-edge R&D to integrate the latest advances in cellular health and anti-aging protocols.

Integrated Ecosystem

Building a comprehensive platform that connects clients with personalized programs, data insights, and community support.

Franchise Expansion

Scaling the Rebirth Longevity Rooms model across key global markets with a premium, repeatable operating framework.

Technology Leadership

Remaining at the forefront of wellness innovation through sustained R&D investment and a continually evolving technology stack.

Community & Brand

Cultivating a loyal global community of longevity-focused individuals through trust, aspiration, and shared progress.

FOUNDATION

Core Mandatory Devices

Mandatory Equipment for Every Location

These foundational devices form the operational backbone of our global distribution model. Their integration supports a standardized, high-quality client experience and underpins the stated revenue model. All devices are classified for wellness applications and are not intended to diagnose, treat, or prevent medical conditions.

All devices are registered with the U.S. Food and Drug Administration (FDA) under Establishment Registration & Device Listing.

Establishment Registration & Device Listing

Owner/Operator: Svenson Network Holdings Limited

Owner/Operator Number: 10093166

Svenson Chair

Pelvic Floor and Core Support Device

The Svenson Chair is a core device designed for seamless integration into facility operations as a non-invasive wellness solution.

Operational Protocol

This automated, non-invasive electromagnetic wellness device is used while the user remains fully clothed and seated. Sessions last approximately 30 minutes and are designed for fully operator-independent use.

Revenue Generation Model

The device supports recurring revenue through per-session fees or inclusion in membership plans. Its broad appeal helps drive membership acquisition and encourages additional service uptake. It is classified as a wellness device and is not intended for the diagnosis, treatment, or cure of any disease or condition.

Operational Requirements

The device requires minimal staffing, standardized training, and no consumables. Its medium footprint supports efficient space planning and streamlined facility management.

Market Positioning

The Svenson Chair reinforces the global distribution value proposition within the wellness sector. It is positioned as a non-invasive wellness device, not a medical device or medical treatment.

Retail Price: \$68,000

Svenson Redglow

Advanced Red Light Therapy System Overview

Operational Mechanism

The system delivers non-invasive red light exposure through repeatable, user-guided sessions. Each session is performed with the user properly positioned to ensure optimal coverage and consistency.

Revenue Generation Model

This system is positioned to drive revenue through individual session sales, bundled service packages, and integration into existing membership offerings.

Regulatory Classification

Svenson Redglow is classified as a general wellness light therapy device. It is not designed or intended for the diagnosis, treatment, cure, or prevention of any disease or medical condition.

Intended Applications

Svenson Redglow is designed for general wellness use, supporting recovery, physical performance, and lifestyle optimization. It is not intended to diagnose, treat, or prevent any medical condition.

Operational Requirements

It requires minimal staffing, standardized training, no consumables, and a compact footprint, enabling efficient day-to-day operation.

Retail Price: \$46,000

Svenson FormFlex

HIFEM and RF Body Optimization System

Revenue Model Positioned as a flagship aesthetic and performance service, with revenue generated through individual sessions, package sales, and membership upgrades.	Technology Overview A non-invasive platform combining High-Intensity Focused Electromagnetic (HIFEM) stimulation with Radiofrequency (RF) technology to support body contouring and muscle toning.	Session Protocol Standard sessions last approximately 30 minutes, helping maximize client throughput and operational efficiency.
Operational Requirements Requires minimal staffing, standard training, no consumables, and a medium footprint suited to dedicated treatment areas.	Client Engagement Broadens the service menu for clients seeking performance enhancement and aesthetic refinement, supporting both acquisition and retention.	

Disclaimer: The Svenson FormFlex system is classified as a wellness and aesthetic device. It is not intended for medical diagnosis, treatment, or cure of any disease or condition. Users should consult with a healthcare professional regarding any medical concerns.

Retail Price: \$46,000

Supporting Wellness and Recovery Devices

A Strategic Path to Expansion and Revenue Diversification

Expand Service Offerings

Introduce complementary modalities that appeal to a broader client base.

Increase Visit Frequency

Create more reasons for clients to return by offering a wider range of services.

Strengthen Client Retention

Deepen loyalty and elevate perceived value through a more comprehensive wellness experience.

Disclaimer: All wellness and recovery devices and associated services are classified for aesthetic and general wellness purposes; they are not intended for medical treatment, diagnosis, or curing of any disease or medical condition.

Svenson Motion AI

AI Robotic Wellness and Recovery Platform

Intelligent Wellness System

An advanced AI-powered robotic platform designed to deliver structured wellness and recovery protocols.

Autonomous Operation

The system enables operator-independent sessions, delivering multimodal stimulation with minimal staff involvement after initial client setup. This helps reduce operational overhead.

Positioning and Revenue Model

This technology supports premium session pricing and integration into elevated membership tiers, strengthening the franchise's service portfolio. No consumables are required for operation.

Regulatory Classification

Classified as a wellness technology, this platform is intended for general wellness applications. It is not intended to diagnose, treat, cure, or prevent any medical condition or disease.

Brand Alignment

Integrating this technology reinforces Rebirth's position as a forward-thinking longevity brand, while supporting service differentiation and revenue diversification across the franchise model.

Retail Price: \$128,000

Svenson Emerald Laser

Low-Level Laser Technology for Body Contouring Applications

Non-Invasive Application

Uses **low-level laser light** for body contouring without direct skin contact. Designed exclusively for wellness applications.

Automated Sessions

Delivers **automated sessions** under standardized parameters, creating a consistent and non-sensory client experience.

Revenue Model

Supports **session-based pricing** and package offerings, aligning seamlessly with aesthetic service models.

Operational Requirements

Moderate operator training is required. The device operates without consumables and integrates easily with existing body optimization technologies.

Classification & Disclaimer: The Svenson Emerald Laser is classified as a non-invasive wellness and aesthetic device. It is not intended to diagnose, treat, cure, or prevent any disease or medical condition. Operation and application are subject to applicable local, state, and federal regulatory requirements.

Retail Price: \$28,000

Performance and Oxygen Systems

Oxygen Modulation and Conditioning Equipment

This product category includes systems for oxygen modulation and performance, designed for conditioning protocols, endurance support, and recovery workflows. These devices are intended for general wellness and fitness applications and are not designed for medical treatment or diagnosis.

Product Description

Equipment engineered to create controlled oxygen environments that support physical conditioning and recovery.

Key Features

- Controlled atmospheric oxygen modulation
- Seamless integration with conditioning routines
- Support for post-exertion recovery

Operational Requirements

- Minimal staffing requirements
- Standard user training provided
- Dedicated space required for equipment setup

Revenue Model

Offered on a per-session basis or as part of structured conditioning programs.

Regulatory Classification

These systems are classified as general wellness devices and are not intended for the diagnosis, cure, mitigation, treatment, or prevention of disease.

Hypoxic and Hyperoxic Generator Oxygen Training and Recovery System

Performance and Recovery Support

Designed to support endurance, conditioning, and overall wellness protocols.

Controlled Oxygen Modulation

Enables structured hypoxic and hyperoxic breathing sessions within professional wellness programs.

Operational Requirements

Requires moderate operator training, no consumables, and a dedicated operational area.

Service Portfolio Enhancement

Expands your service offering and appeals to clients seeking high-performance wellness solutions.

Note: This device is classified as a wellness and performance tool and is not intended for the diagnosis, treatment, or prevention of any medical condition.

Retail Price: \$24,000

Thermal and Recovery Technologies

Advanced Physical Restoration Systems

This category includes specialized equipment designed to support physical restoration, accelerate muscle recovery, and promote stress reduction through controlled thermal and non-invasive modalities. Applications may include infrared therapy, cryotherapy, and localized thermal treatments.

Core Features

- Precise thermal modulation for targeted recovery support.
- Non-invasive protocols for muscle and tissue restoration.
- Seamless integration with existing wellness programs to elevate the client experience.

Operational Requirements

- Dedicated space for installation and client privacy.
- Standard electrical and ventilation infrastructure.
- Initial staff training is required; specialized medical personnel are not.

Revenue Model

- Session-based service fees for individual access.
- Membership add-on options that increase client lifetime value.
- Package offerings that integrate seamlessly with complementary wellness services.

Regulatory Classification

These devices are classified for general wellness and physical recovery applications. They are not intended for the diagnosis, treatment, cure, or prevention of any medical condition or disease. Compliance with local health and safety regulations is mandatory.

Svenson Cryo

Localized Cryotherapy System

Feature: Targeted Application

Delivers precise, non-invasive cold exposure to support localized tissue recovery and complement broader wellness protocols.

Operational Efficiency

Enables brief treatment sessions with minimal supervision, supporting streamlined client flow and high operational efficiency.

Resource Requirements

Requires minimal operator training, no consumables, and a compact footprint suited to a wide range of facility layouts.

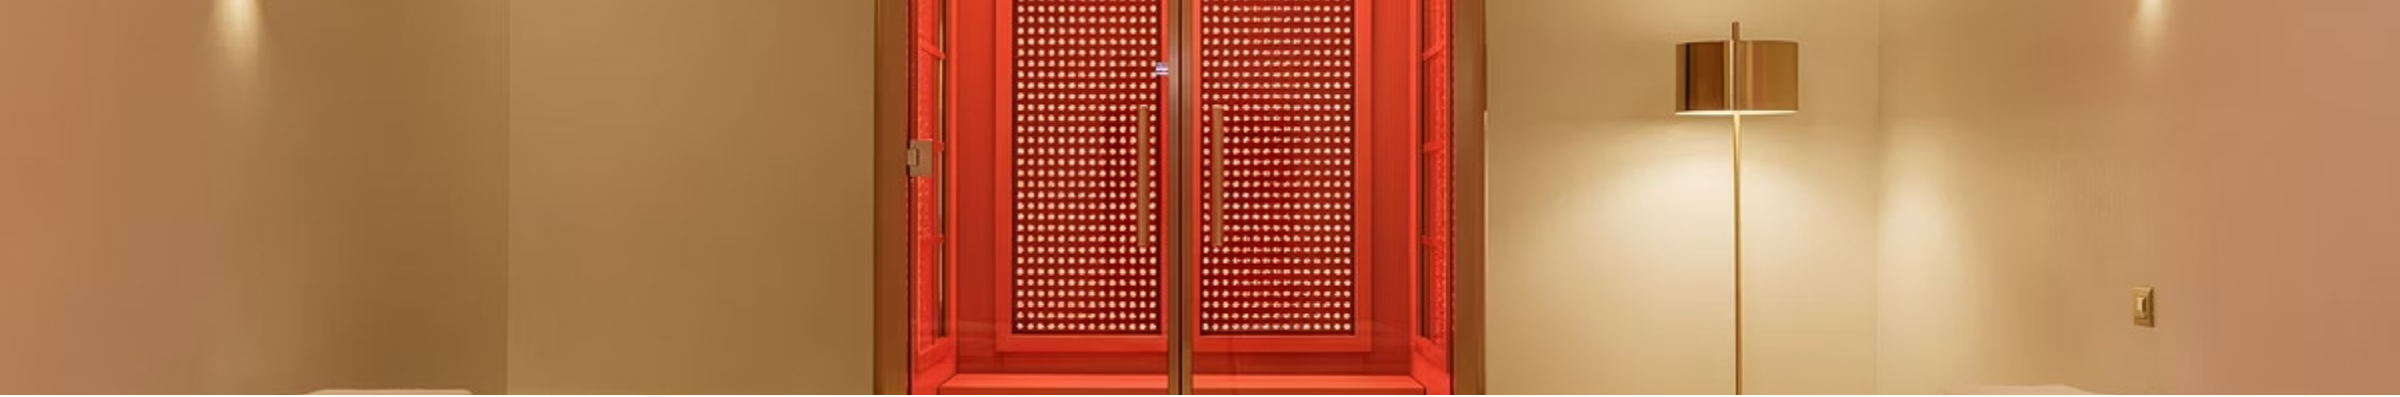

Service Enhancement

Integrates seamlessly with existing recovery offerings to expand service depth and strengthen client retention.

Disclaimer: The Svenson Cryo system is classified as a general wellness device and is not intended to diagnose, treat, cure, or prevent any medical condition or disease.

Retail Price: \$192,000

Svenson Red Light Sauna

Whole Body Photobiomodulation Cabin

Device Functionality

Delivers full-body photobiomodulation designed to support wellness, relaxation, and recovery routines.

Technical Specification

The enclosed cabin provides comprehensive exposure to red and near-infrared light wavelengths.

Client Experience

Creates a structured, immersive environment that elevates comfort and enhances the perceived value of each session.

Revenue Model

Well suited for membership programs and repeat-use service packages that support retention and recurring revenue.

Operational Requirements

Requires minimal staff oversight, no consumables, and a dedicated space for installation.

Regulatory Classification

This device is classified for wellness use only and is not intended to diagnose, treat, cure, or prevent any medical condition or disease.

Retail Price: \$38,000

Hyperbaric Oxygen Chamber System

Wellness and Longevity Infrastructure

This system is a general wellness device designed to support recovery and longevity-focused care. It is not intended for the diagnosis, treatment, cure, or prevention of any disease. Consult a qualified healthcare professional before use, especially if you have existing medical conditions.

Svenson Ultimate HBOT

Integrated Oxygen Wellness System

Cellular Support & Longevity

This wellness system is designed to support cellular vitality and long-term wellness. It is not intended for the diagnosis, treatment, or prevention of any medical condition.

Standardized Operating Procedures

Operation follows predefined, controlled protocols to ensure consistent delivery within established wellness guidelines.

Revenue Model & Positioning

The Svenson Ultimate HBOT is positioned as a premium offering, available for individual sessions or integration into higher-tier membership programs.

Operational Requirements

Implementation requires specialized staff training, dedicated facility space, and robust operational oversight.

Non-Medical Classification

This device is classified strictly as a general wellness system. It is not approved or intended for medical use, including the diagnosis, cure, mitigation, treatment, or prevention of disease.

Market Differentiation

Introducing this system strengthens brand positioning in the global longevity and wellness market, signaling a commitment to advanced non-medical technologies.

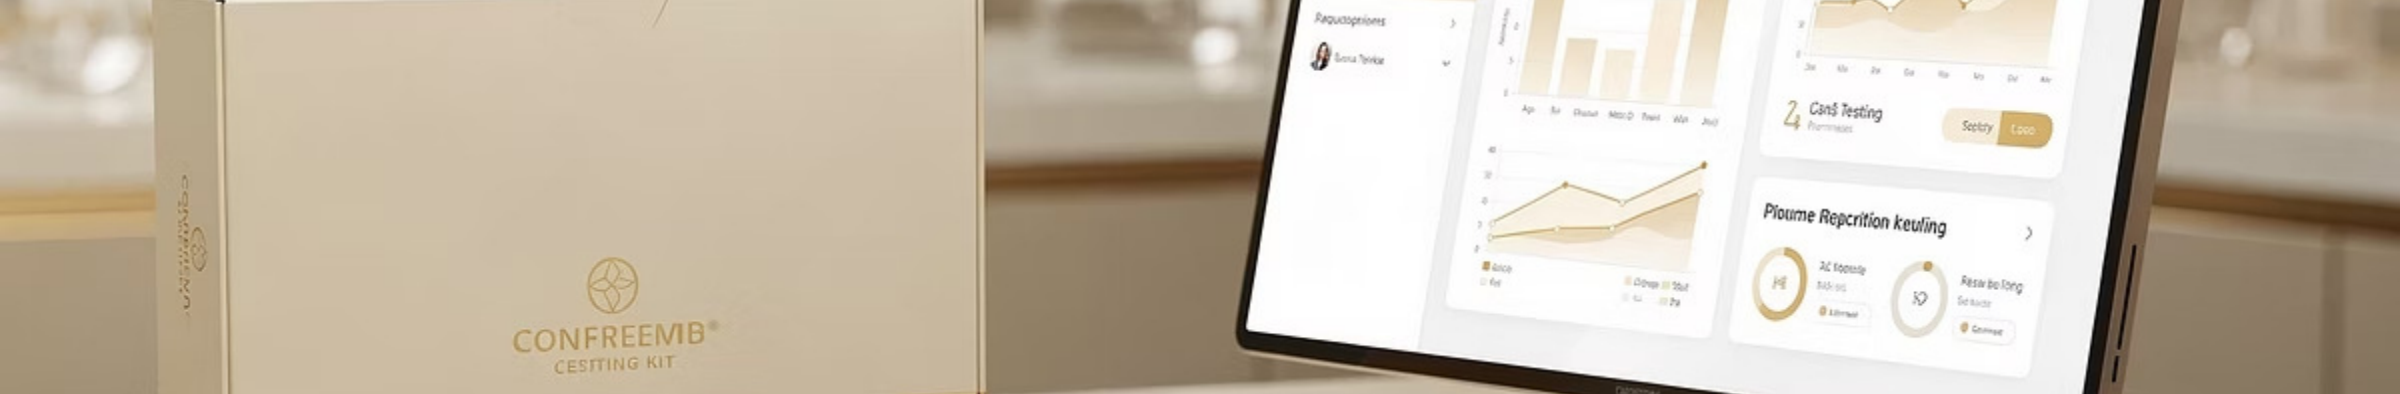

Retail Price: \$152,000

Client Assessment and Personalized Planning

Methodology for Personalized Wellness Program Onboarding

DNA Precision Testing Service

Genetic Wellness Analysis Platform

This service delivers genetic analysis for general wellness and lifestyle insights only. It is not intended to diagnose, treat, prevent, or predict any medical condition or disease. All interpretations are informational and do not replace professional medical advice.

Genetic Insights Provision

Analyzes a DNA sample to generate individualized reports on genetic tendencies relevant to lifestyle and wellness, forming a foundation for personalized wellness planning.

Digital Reporting and Accessibility

Provides secure digital access to client reports, designed for clear interpretation with minimal training. Includes robust digital integration capabilities.

Service Classification and Progression

Serves as an entry point within the wellness portfolio, designed to support progression into complementary programs. This service emphasizes personalized longevity and overall wellness support, without offering medical diagnosis or treatment.

Retail Price: \$580

Specialized Wellness Solutions

Advanced Client Service Offerings

This section highlights specialized services designed to support client wellness and nutritional optimization. Each offering is intended exclusively for general wellness and lifestyle enhancement, and is not presented as a medical treatment, cure, or prevention for any disease or condition. All services are delivered by qualified professionals in accordance with established regulatory guidelines.

Fresh Umbilical Cord MSC Stem Cells

Specialized Regenerative Wellness Offering

This service features fresh mesenchymal stem cells derived from umbilical cord tissue and is offered only in jurisdictions where permitted by law.

Cell Sourcing and Handling

Fresh umbilical cord-derived mesenchymal stem cells are sourced, processed, and handled under rigorous quality and chain-of-custody standards for wellness applications.

Revenue Model

A high-touch, low-volume offering with strong per-case revenue potential, supported by dedicated operational oversight and protocol-driven delivery.

Market Placement

Positions Rebirth within the regenerative longevity sector, backed by a compliant global distribution framework and operational infrastructure.

Subject to local laws and regulations. This product is intended for wellness purposes only and is not designed to diagnose, treat, cure, or prevent any disease.

Rebirth NAD⁺ IV

Cellular Energy and Longevity Support Infusion

The Rebirth NAD⁺ IV is a premium wellness infusion designed to support cellular function and overall vitality. It is offered exclusively as a wellness service and is not intended to diagnose, treat, cure, or prevent any disease.

Cellular Function Support

Helps support healthy cellular function and energy production within a general wellness framework.

General Wellness Enhancement

Integrates seamlessly into our IV menu as part of a broader strategy for supporting well-being.

Qualified Staff Administration

Administered by trained and certified personnel following established IV protocols and operational standards.

Revenue Model & Usage

Generates revenue per session or through package offerings, with attractive margins and strong potential for repeat engagement.

Operational Requirements

Requires a dedicated IV administration space and specialized consumables to support efficient, compliant delivery.

Service Classification

Positions Rebirth within the longevity and cellular optimization space as a non-medical wellness offering.

Retail Price: \$62 / vial

Disclaimer: This service is for wellness purposes only and is not intended to diagnose, treat, cure, or prevent any disease. Results may vary. Consult with a healthcare professional before beginning any new wellness regimen.

Glutathione IV

Intravenous Wellness Solution

Purpose

Designed to support general wellness, with a focus on metabolic processes and cellular function.

Composition

Delivers glutathione, a powerful antioxidant, through intravenous infusion.

Revenue Model

Available as an individual service or within structured package offerings. It also pairs well with complementary IV therapies, including NAD+ infusions.

Classification

This product is intended for wellness applications only and is not designed to diagnose, treat, cure, or prevent any disease. It is administered by qualified, IV-certified personnel in a designated treatment area.

Retail Price: \$28 / vial

Additional IV and Injectable Wellness Solutions

Product Customization

Formulations can be tailored to align with client preferences and market demand, within established protocols.

Standardized Administration

All services are delivered by qualified personnel under strict operational and safety protocols. These offerings are not medical treatments.

Revenue Model

Revenue is supported through a diversified service mix, including customization and bundling opportunities.

Regulatory Compliance

These offerings are classified strictly as wellness services. Franchisees are responsible for complying with all local and regional regulations governing operations. They are not intended for the diagnosis, treatment, cure, or prevention of any disease.

Retail Price: \$28 / vial (Myers)

About Rebirth Globe

A premium longevity and advanced wellness clinic concept

Rebirth Globe is a forward-looking wellness destination designed for health-conscious individuals seeking greater vitality, resilience, and long-term well-being. It brings together advanced wellness technologies, longevity-focused therapies, and regenerative treatments in a premium environment that feels personalized, elevated, and results-driven.
